

HILDEWELL TING TANG-1911 TIME CAPSULE DISCOVERY IN A BOOK

The single most fascinating chow item that shifted my focus in the Worldchow archives from displaying just my own collection

on a website... to curating a full fledged archive, was sent to me by a dear friend I met in Italy a few years ago, Helene Vacchini.

In her search for a book to find more info about her rescued chow Shirin, she somehow managed to luck into this treasure trove of very important chow history. Below is her first correspondence with me regarding her find and the quest for more information on this dog "Hildewell Ting Tang"

Before I send you all the rest of the other stuff in the next few days .. I like to tell you something...

Inside mine Original "The Chow Chow of Lady Dunbar"...
That I bought in England I found this....

1) The Pedigree glued inside the first page of the book...
The oneof Hildewell Ting Tang

2) 2 photos of Chow Chow glued on the inside the first
hard cover of the book....

- They are photos of the same dog in 2 different
positions..in front of a house entrance...

Is probably her house ???

Could it be the pix of Ting Tang ???

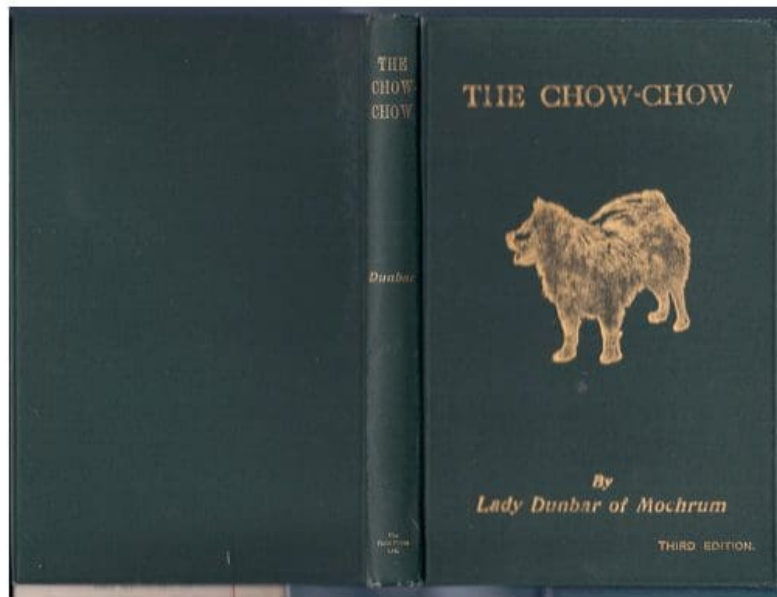

3) And 2 photos of a Baby Chow..

1°) is on top of a wooden small
table.... you'll see a woman holding him with a scottish
colored skirt....

2°) photo... is the same baby Chow on the
same table outside in the garden...

who is it ?? and why is the Pedigree glued in the book ???
Good question??

I send them to you... keep in mind that they are not so clear...
Ok I go and look for them.. Ciao

These are OLD photos of what we are pretty sure is the dog in the pedigree, HILDEWELL TING TANG Born May 18, 1911 in England. Mrs. Garrett Botfield herself signed the document and had handwritten notes throughout

The chows in this pedigree are the WHOS WHO of the top players in the history of our breed. My goal is to find photos and more information on every dog in this pedigree to fill next to their names below. The breeder *Mrs. Garnett-Botfield* has always been noted for the largest kennels of the DARKEST RED CHOWS IN ENGLAND and has sent some very fine dogs abroad-..(Bluebook of Dogdom 1912) She was also very involved in a number of garden societies with a fair number of plants I'm finding named by her in the "alpine" varieties.

ABOVE: Ch. Chinese Chum who was the first USA Chow Champion in 1906 was of Mrs. Botfield's breeding.
